Lecture notes in topics in path integrals and string representations. [Luiz C L Botelho] -- "Functional Integrals is a well-established method. Lecture notes in topics in path integrals and string representations / Luiz C.L. Botelho, Federal Fluminense University, Brazil. Luiz C L Botelho wrote Lecture Notes in Topics in Path Integrals and String Representations, which can be purchased at a lower price at bjarboreals.com Functional Integrals is a well-established method in mathematical physics, especially those mathematical methods used in modern non-perturbative quantum. If all these results turn out to be rigorous, one can see that our self-avoiding fermionic string representation gives a proof that QCD(U(Nc)) should be expected. V. N.
